Dear Friends

We are pleased to introduce our **Rent a Car Ratebook 2017**, a tourist guide oriented to passengers who wish to know Chile, traveling through our highways, advancing into paths and experiencing a journey through hidden and typical corners of our country, wishing to take the car and free the ride, conquering the way.

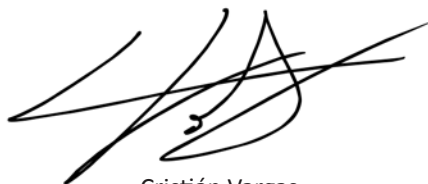

We have also added a new chapter: **Rent a Motorbike**, where we give you a new option to visit Chile.

In this complete road guide we are presenting all the daily and weekly rent a car and drop off rates, vehicle sheets and categories, a driving tips chapter, a complete Roadbook for all the bookings with descriptions of visited places, mileage and the best and most beautiful suggested routes to access them.

We included accurate information regarding programs, tips en route, where to eat, museums and entrance fee, emergency phone numbers, health assistance services and hospitals, Carabineros de Chile (Chilean Police), detailed maps and photos that will support your journey along the roads of our country.

It is in our interest to make of your adventure in Chile an unforgettable moment, becoming your partner during your trip through this complete tool in every moment and place, because we know about Fly & Drive.

Trusting that this tool will help you, we are at your disposal, extending to you cordial greetings.

DRIVING TIPS IN CHILE

In this section we are presenting some important recommendations which will help you to drive safely in Chile.

1. We recommend driving defensively above all in larger cities such as the capital Santiago. In our country, generally, the motorists behave nicely, however it is always important to safeguard the integrity in order to maintain your journey as an unforgettable experience.
2. The use of the cell phone while you are driving is forbidden. Accidents en route caused by lack of concentration during driving are prevented by this measure. The fine for using your cell phone while driving is USD 120 approx.
3. Speed limits: In the urban area, the maximum allowed speed allowed is 60 km/h, on highways the maximum speed is 100 km/h and 120 km/h on Motorways (some specific areas are limited to 100 Km/h, please watch the signs). The speed is constantly monitored by Carabineros de Chile (Chilean Police).
4. The steering wheel is on the left side of the car, which means that you have to drive on the right side of the road.
5. The use of the seat belt is mandatory by law; this measure allows reducing the collision consequences. The fine for not using the seat belt is USD 120 approx.
6. The use of lights as soon as you leave urban areas is compulsory; we therefore recommend to switch your lights on as soon as you start your vehicle. The fine for not using lights out of urban areas is USD 120 approx.
7. Law 20.580 of Zero Tolerance strictly forbids the alcohol drinking for drivers. Any infraction of this law involve severe penalty and / or Jail sentence and loss of all the regarding insurances.
8. In Chile, Carabineros (Police) has an impeccable behavior; therefore, we recommend never attempting to bribe Carabineros. Cabarineros are also helpful and generally very friendly, do not hesitate to contact them or to ask their assistance for any purpose.
9. Most of the Motorways are subject to toll payment. The toll barriers are generally located in the city limits as well as on Region limits. Tolls amounts will vary according to distances as well as destinations (1 to 10 USD / toll). As there are no cash machine facilities or credit card paying facilities on the toll barriers you need to carry cash in Chilean Pesos.
10. Always carry the car documents, your passports and your driving license, there are many routine controls made en route by Carabineros de Chile.
11. In case of emergency, collision or theft, you have to contact Carabineros de Chile as well as the Car rental company. Having a Carabineros constancy in case of accident is compulsory in order to activate the Insurance. ADSMUNDO® emergency numbers are also available for any support or assistance.

This natural sanctuary is made by rare geological formations result of consecutive earth's crust folding, along with the wind, salt and lack of humidity action, creating sceneries similar to our natural satellite. From here it is possible to watch the **Salt Caverns**, and see salt gem, the well-known natural formation "**Tres Marias**" and the "**Duna Mayor**", that is a majestic sand formation. Here you can enjoy a spectacular panoramic view of the Salt Mountain Range and in this privileged position wait for the sunset.
